

CHLORAGUARD®

for enduring bleach resistance.

TREATED

Chloraguard
Advanced generation
bleach resistance
for printed carpets.

Durkan Hospitality's Chloraguard offers full treatment bleach protection for printed carpets.

It's the ideal choice. Chloraguard's innovative performance allows designers to use printed carpets in applications where previously only solution dyed materials would meet bleach specifications. Ideal for use in hotels, senior living, condominiums, apartments, casinos and theaters, Chloraguard offers the tremendous color and pattern flexibility of printed carpets with the peace of mind of knowing your flooring is protected.

HOTELS

SENIOR LIVING

CONDOMINIUMS

APARTMENT BUILDINGS

CASINOS

THEATERS

UNTREATED

But seeing is believing.

We applied a ten percent bleach solution to both samples pictured above. As you can see, after following the company's maintenance guidelines, no color change is evident on the side treated with Chloraguard. So, whether it's the accidental drip from a bleach bottle or the occasional wet traffic from a pool area into a corridor, Chloraguard protects your flooring investment for as long as your carpet is in use.

Performance That Lasts

- Permanent bleach resistance for printed carpets.
- Color and pattern flexibility found only in printed carpets.
- Resists up to 10% solutions of common household bleach, or the equivalent in off-the-shelf cleaners.
- Peace of mind protection guards against accidental spills.
- Guaranteed for the life of the installation.
