SIX FOOT RELEASABLE CARPET

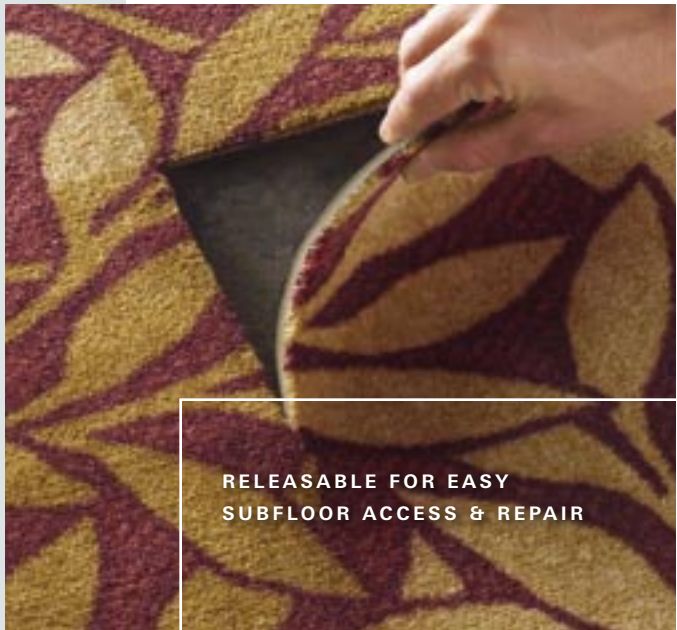

Flexibility and Performance you can bet on.

**DuraFlex® Six Foot Releasable Carpet**  
Flexibility and performance you can bet on.

Revolutionary DuraFlex delivers the premiere features and benefits of both broadloom and modular carpets in one easy to use six-foot width.

**DuraFlex does it all.**

**A Foundation In Performance** Duraflex is an innovative backing from Durkan Hospitality that combines the advantages of both broadloom and modular carpets. Built upon Durkan's industry leading Duralon backing system, Duraflex gives you the peace of mind knowing your cushion carpet will withstand the toughest roller and foot traffic. In addition to the benefits the Duralon backing system provides, Duraflex takes performance and flexibility to a new level with its ability to release from the floor like a modular carpet. Now you can enjoy modular benefits without

having to sacrifice the tremendous advantages broadloom brings to the hospitality market.

**Complete Design Flexibility** Duraflex allows designers to create any size pattern they wish to, and since there are no limitations on the base grade of carpet, the possibilities are endless. No matter how expansive the design, Duraflex makes broadloom printed carpet possible for sub floor access environments. No need to design around carpet tile seams or have concern over how modular seams may become evident once tiles are installed.

**Pull it Up, Put it Down** Duraflex installs with NuSprayLok™ releasable adhesive for easy sub floor access and repairs. You can pull it up and place it back down as many times as necessary without sacrificing performance or aesthetics. And the best part is you decide where to create seams for floor access. No need to place seams in three-foot squares throughout the facility to obtain releasability that is needed in a few spots. And because seams are the most vulnerable part of any carpet you can enjoy peace of mind with 85% fewer seams in a Duraflex installation compared to a modular installation.

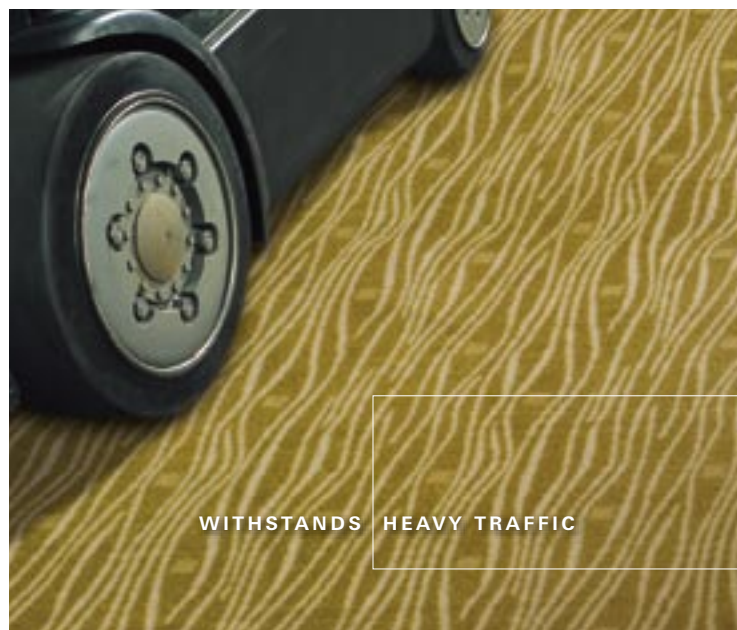

- Combines benefits of both broadloom and modular carpets
- Proven Duralon backing, premiere system for the hospitality Industry
- Ideal for heavy wheel and foot traffic
- Superior to urethane backing systems
- No limitations on base grade construction
- Complete design flexibility for expansive design

- Eliminates need to design around modular seams
- Removes checker boarding associated with modular installations
- Reduces seams in Installation by 85%
- Fully releasable for easy floor access and cookie-cut repairs
- Easy access to sub floor only in spots where needed

- Quicker Installation means less downtime
- Immediately accessible to wheel and foot traffic
- Available In Duraflex MB for added moisture barrier
- Backed by Durkan's Industry leading performance warranty

UNLIMITED DESIGN FLEXIBILITY (SPECTRAFIT)

WITHSTANDS HEAVY TRAFFIC
