

UltraSet™ Modular System

*Please note: UltraSet RC contains all of the above features plus a minimum of 35% pre-consumer recycled content by total product weight.

UltraSet Modular System utilizes a proven, time-tested performance system of manufacturing modular tile. UltraSet's structured backing system consists of several composite materials, each of which serves a different purpose, producing a synergistic result of high tuft bind, high stability, and lifetime performance. The thermo-stable attributes of UltraSet Modular Systems resists cupping, doming and dishing to produce modular tile installations that will perform for the life of any project.

- History of proven performance introduced over 15 years ago
- More than 50 million square yards installed in the most demanding environments
- UltraSet has a history of extending the useful life of the installation – the ultimate in sustainability
- Engineered with advanced premium vinyl compound which gives long-term strength and stability
- Thermoplastic materials resist mold and mildew and are impervious to moisture, even during and after cleaning.
- UltraSet RC contains a minimum of 35% pre-consumer recycled content by total product weight
- Unsurpassed dimensional stability – will not cup, dome or dish
- Lifetime product warranties covering:
 - Cup, Dome, Dish
 - Dimensional Stability
 - Edge Ravel
 - Zippering
 - Delamination
 - Impervious to Liquids
 - High Tuft Bind
 - Pilling and Fuzzing
 - Wear
 - Static Protection
- Meets or exceeds the requirements of the British Spill and the 10,000 Impact Penetration Test (not at seams)
- Carpet & Rug Institute Green Label Plus Certification
- Meets all Federal requirements for the Americans With Disabilities Act
- Superior acoustical and sound absorbing properties
