Perfect Styling

Modular Walkoff Systems are available in a wide range of patterns, colors and price points. To find the style that fits your facility – and your budget, contact your Mohawk Group representative.

Mohawk Group Warranties Protect Your Investment

All Walkoff Systems are warranted against these common failures for at least 10 years – or as much as the full life of your installation. Contact your representative for details.

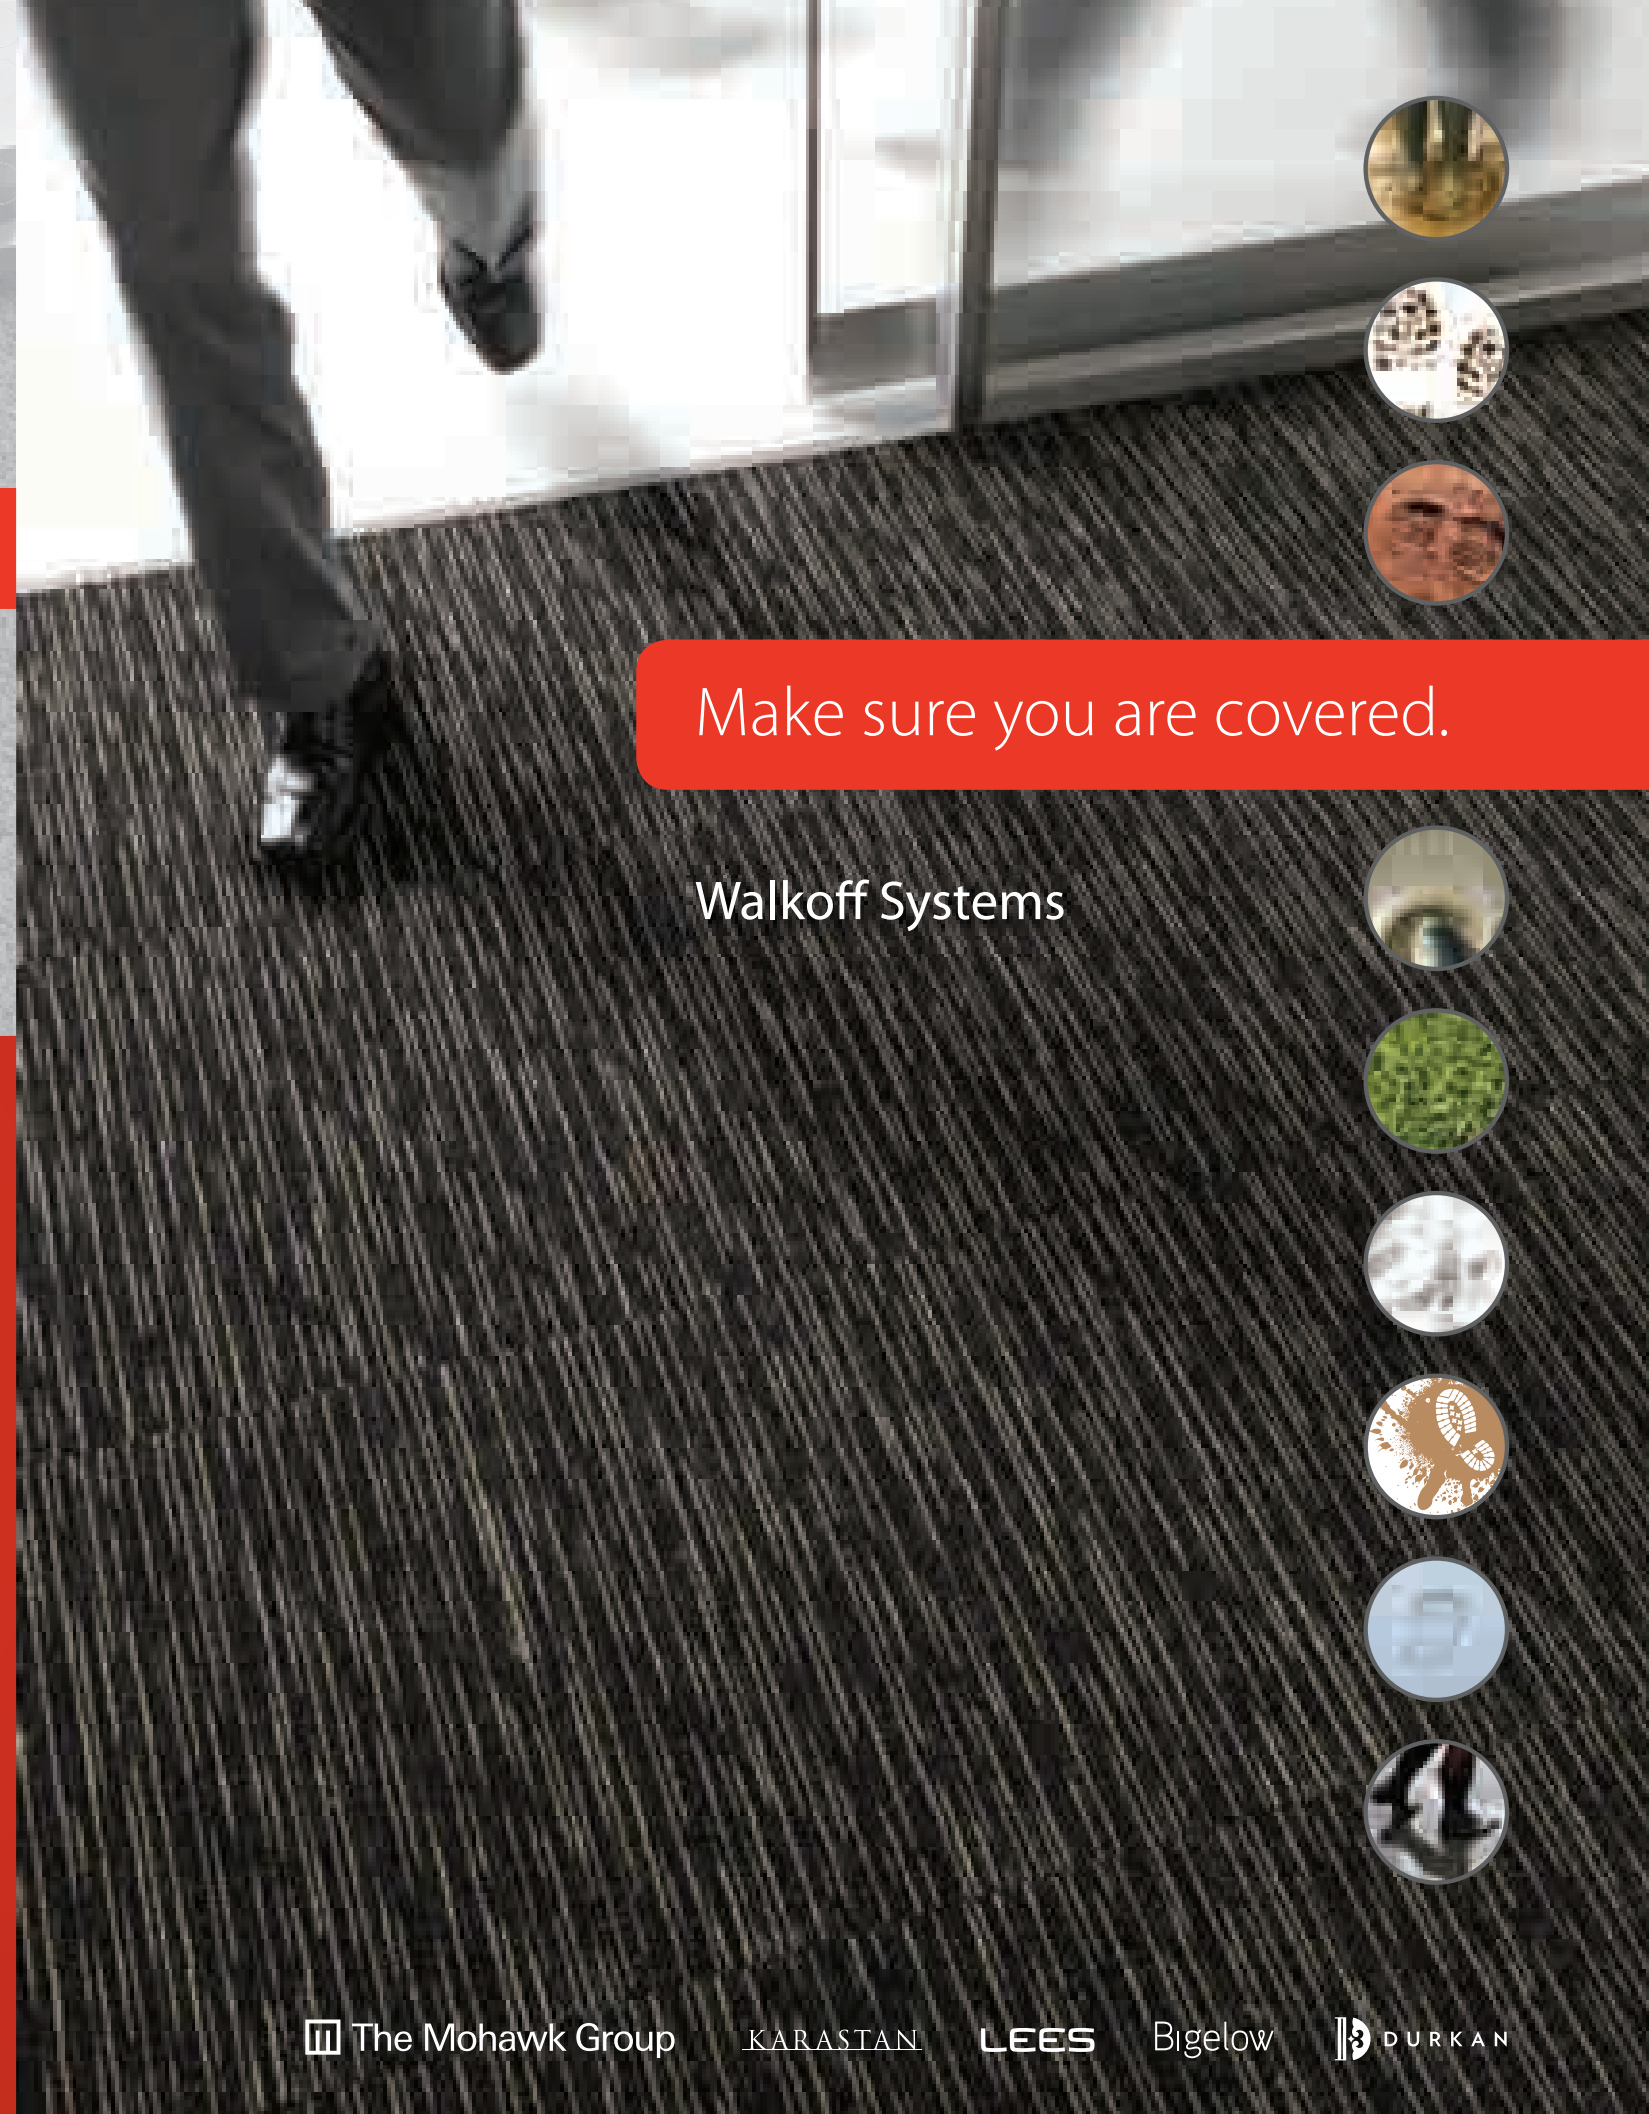

- Fiber wear
- Backing material
- Performance attributes

For additional protection and warranties related to staining, ask your Mohawk Group representative about products manufactured with patented Duracolor®.

Scraper Yarn

Lifetime Warranty for Lees Walkoff products manufactured with Scraper Yarn - a 100% Nylon 6,6 filament that delivers optimal appearance retention; enhanced soil capture; and added moisture absorption.

*Scraper yarn and Duracolor are available on Lees branded products.

Make sure you are covered.

Walkoff Systems

Manage your risk.

Avoid liability of slip and fall incidents in your facility, while extending the life of your flooring investment. The Mohawk Group offers a variety of Walkoff Systems, providing a high traction, moisture-absorbing surface that significantly reduces the risk of accidents caused by slippery entryways.

Trip Hazard

Area mats can bunch or ripple, causing people to trip as they enter your facility. Secured firmly to the sub-floor, Mohawk Group Walkoff Systems all but eliminate this risk.

Slip Hazard

Hard surface flooring combined with traditional matting, is inherently more slippery than carpet – and it becomes even more hazardous when wet or soiled. With a higher coefficient of friction than tile, wood, vinyl, concrete and traditional matting, Mohawk Group Walkoff Systems help ensure secure underfoot traction.

#1

Commercial insurer CNA identifies lack of slip resistance as the number one cause of slip and fall accidents.

570,000

Slips, trips and falls cause 15 percent of the 3.8 million disabling workplace injuries each year, as well as an estimated 5,100 workplace fatalities. Property owners can be held liable for all direct and indirect costs associated with these incidents.¹

\$15.9 Billion

At an average cost of \$28,000 per injury, total liability exposure for the direct costs of slip and fall accidents approaches \$16 billion dollars per year. Indirect costs can be as high as \$940,000 per incident, increasing your liability by more than 3,300 percent.¹

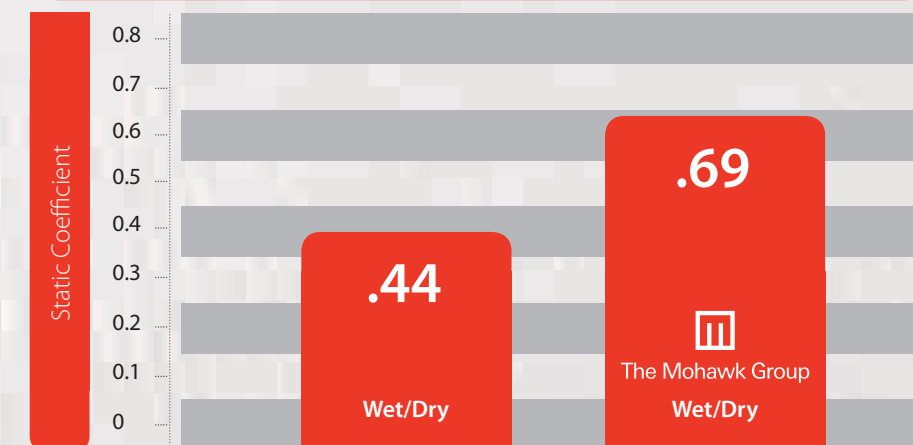

8,000,000+

In a 2004 study, the National Center for Injury Prevention and Control estimated that more than 8 million people were injured in slip and fall accidents.

1. University of Florida Extension, Preventing Injuries from Slips, Trips and Falls.

Better by Design

Walkoff Surface Traction Comparison

Mohawk Group Walkoff System vs Traditional Mats

On average, Mohawk Group Walkoff products provide 60% higher traction under both wet and dry conditions as compared to traditional matting solutions.²

2. Professional Testing Laboratory, Inc. - Static coefficient friction, Test Method ASTM C1028-96.

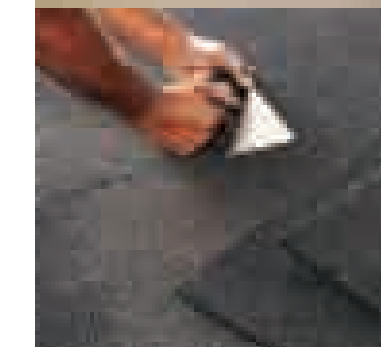

Protect your investment.

Mohawk Group Walkoff Systems capture 90% of external moisture and soil right at the door. Walkoff Systems are easy to maintain and help extend the life of your flooring investment.

Ease of Maintenance

Simple daily vacuuming, supplemented by a cost-effective and easy-to-follow maintenance program, will keep your entryways, as well as your overall facility, clean, safe and beautiful.

Easy Replacement

When using a modular Walkoff System, you can selectively replace worn tiles in minutes.

Walkoff Systems are not restricted to entryways. The Mohawk Group recommends a Walkoff System for any high traffic area that receives six (6) footfalls or more.
