

COMMUNITY

Through Mohawk products in rebuilding green schools and homes, we invest in the education and future of the next generation in their towns.

Volunteer Programs

- We encourage our employees to be involved in their communities. One example of our commitment is giving our employees paid time off to serve as volunteer firefighters

Going Green “The Green House” Home Project

- Mohawk Industries was a key contributor in Brock Built’s Going Green “The Green House,” a unique charity project. The house was auctioned with proceeds going to benefit Children’s Healthcare of Atlanta
- Mohawk contributed SmartStrand® carpet made with DuPont™ Sorona® renewably sourced polymer to “The Green House,” while DalTile, a Mohawk sister company, contributed the ceramic tile
- Mohawk Industries is a long-time supporter of Atlanta ABC Network affiliate WSB-TVs “Going Green Georgia” initiative, sponsoring awards for the “Green Champion of the Week”

HUMAN RACE

Innovation at work—for the community

IN YOUR SPACE 

The Mohawk Group

COMMUNITY

In addition to our efforts toward environmental sustainability, we are also committed to building a better future for individuals and our communities.

Re:work

- Re:work workshops and webinars are dedicated to filling an industry void with information to assist with resume writing, interview skills, portfolio development and financial planning for these economic times and beyond

Specify for a Cure®

- On behalf of our customers, The Mohawk Group donates 25 cents per square yard of Karastan Contract and Durkan specified carpet to Susan G. Komen for the Cure®. To date, we have donated more than \$3 million to this worthwhile cause

Easter Seals® Partnership

- We work closely with a large number of Easter Seals workers – individuals with physical and mental disabilities – to assemble most of our sample folders
- In doing so, we have set an example for community involvement that other manufacturers have begun to follow

GreenWorks™ for Kids

- Working with public schools in the North Georgia area, Mohawk Industries has recovered thousands of PET bottles – keeping them out of the landfill and teaching future generations the importance of recycling. Mohawk paid the school districts for the bottles. The earned money is used to purchase books
- In addition to PET bottles, Mohawk Industries also helps the students with their recycling efforts by collecting paper and aluminium which is added to our internal waste stream. This initiative creates additional income for the schools

United Way™

- Our partnership with America's largest charity, United Way, allows us to support the widest possible range of charitable organizations in our local communities. We participate in various United Way programs across our more than 200 different facilities

Greensburg, Kansas

- In Greensburg, we partnered in the rebuilding of the Greensburg School that was lost in a tornado on May 4, 2007. Through Mohawk Industries products used in the rebuilding of green schools and homes, we invest in the education and future of the next generation

Global Green USA® Holy Cross Project, New Orleans

- Our involvement with Global Green USA in the New Orleans' Holy Cross Project will protect and promote the growth of the Lower Ninth Ward, its families and children by providing flooring for five single-family homes, a 10-unit housing facility and a community center (all designed to earn LEED Platinum Certification)

GED Education

- We not only create valuable employment opportunities in our communities, but also help our employees further their education and advance in their careers by offering classes to prep them for the GED exam
