Appearance:

White viscous aqueous emulsion.

Product Description/Applications:

The Mohawk Group Self Lock Tile Adhesive is a releasable, pressure sensitive adhesive specially engineered to install carpet tiles in a grid or total glue down installation. This premium adhesive is formulated to facilitate release and re-bonding of carpet tiles while permanently retaining its tack, allowing individual tiles to be lifted out easily and replaced without substantial loss of adhesive properties.

The Mohawk Group Self Lock Tile Adhesive is made with broad spectrum antimicrobial additives to protect the adhesive from bacteria and fungal growth.

The Mohawk Group Self Lock Adhesive is nonflammable and both alkali and water-resistant. It is resistant to plasticizer migration from carpet tile backing and can be applied using common tools and techniques over a variety of sub-floor surfaces. This adhesive has low odor and "zero" calculated VOC's (based on no solvents used), which make it ideal for use in schools, health care facilities, public buildings and anywhere odor is a concern. The Mohawk Group Self Lock Adhesive also meets or exceeds California requirements as specified in Rules 102 and 443, as well as California SCAQMD Rule 1168.

The Mohawk Group Self Lock Adhesive is approved for CRI Green Label Plus.

Clean up:

Clean tools and equipment with soap and water while the adhesive is still wet. Dried or tacky adhesive will require the use of a solvent cleaner.

Storage:

Store in a cool, dry area away from heat sources. Do not allow the adhesive to freeze.
